

Animal Block Mixture

Items Needed:

2Gal. Pump Sprayer

12 Cups of Brewed Coffee

12 oz Can of Beer

¼ Cup Garlic Oil

¼ Cup Orange Oil

¼ Cup Lemon Juice

1 New Drier Sheet (*I use Downy liquid. The dryer sheet will break down and can clog the sprayer filter and nozzle.*)

1.5 Gal of WARM water

Mixture:

Place the Drier Sheet (or Downy liquid) into a 2Gal. Pump Sprayer and pour in the remaining ingredients. Let mixture set (to cool) for 1hr, before using.

Application:

Treat target area, early in the morning, while the ground is moist and cool.

Reapply as needed, due to scent dissipation, caused by time and/or weather.

Apply on a random schedule to avoid establishing a "pattern."

This does not work on aquatic animals e.g. Beavers.
